### Misfire running on 3 cylinders - TDIClub Forums

#1 is closest to timing belt end, firing order is 1 3 4 2 anti clockwise to figure out where #1 needs to be, rotate engine to TDC on the cam and the rotor arm needs to be pointing at a notch in the outer lip of the dizzy, if not rotate it till it does. then fit spark plug lead #1 where the arm is pointing.

### What is the firing order for a 1997 VW Golf - Answers

Firing order-1.3.4.2.The distributor turns clockwise.Only one wire going from central plug of a distributor to the coil pack.Cylinder 1 is on a front of the engine/not on a gearbox side/ Apr 25, 2010 | 2001 Volkswagen Golf

### How to diagnose and fix a Engine Misfire

Cylinder # 1, from front to back. Cylinder #2. Cylinder # 3. Cylinder # 4. Looks like I found the problem. It did have a slow coolant leak and I was going to address it when weather got warmer. You are correct in deducing some sludge in fill tank. I had attributed this to a faulty oil cooler but it may well be the Head Gasket in Hindsight.

### Volkswagen Firing Order

EA211 1.4 TSI Engine Problems and Reliability. Compare to EA111 1.4 TSI, the new engine got rid of its main shortcomings. The stretching out timing chain was deleted and replaced with timing belt designed for entire engine lifespan (that is VW's official statement).

### **1.9-Liter TDI Engine with Pump Injection**

I have a 2012 VW Golf GTI, and the past couple months it's been running rough, particularly when cold. My Ross-Tech cable shows it missing on cylinder 3, usually around 1,000rpm - 1,100rpm. I've tried: \* Installing new spark plugs \* Swapping coils (2 & 3, and 1 & 3 just to be sure). It's fine under heavy throttle and generally only misfires when I'm gently on the throttle.

The firing order for all VW 4 cylinder engines is 1-3-4-2, with cylinder no.1 next to the camshaft pulley wheel. Asked in VW Golf , VW Golf GTI , Radio Obtain radio code for 1997 VW golf ?

### **Firing Orders Repair Guide - AutoZone**

Firing order is 1 3 4 2- but that has nothing to do with any results / suggestions from the OBD modules- those are labeled per the standard cylinder numbering- #1 at the timing belt end, #4 at the cam chain end. Not all engines are #1 at the cam belt / chain- the 2.5L rabbit is backwards for example, so be careful with that.
