The issue was that the 917 was initially... not very good. In fact, it was outright dangerous. Porsche drivers reported that the car was blisteringly quick, but displayed terrible handling characteristics at high speed - the 917 was designed to be low drag, but at speed the rear of the car would lift an extraordinary amount.

## **Porsche 917-30 driven by Brian Redman Goodwood 2011**

The heart of the 917 was its new engine. The engine used identical cylinders to those found on the 908, just four more, giving a twelve cylinder engine displacing just under 4.5 litres. Two things set the new '912' engine apart from the older engines: the design of the crankshaft and of the camshafts.
