from authors who have chosen to give away digital editions. There are a few paid-for books though, and there's no way to separate the two

T1 and T3 Lines for Network Communications

Decimal numbers are numbers whose place values are based on 10s. Whole numbers are actually decimal numbers that are greater than or equal to zero. The place-value chart can be extended to include numbers less than one, which are sometimes called decimal fractions. A decimal point is used to separate the whole number part of the number and the fraction part of the number.

Datetime Datatypes and Time Zone Support

TIME_TRUNCATE_FRACTIONAL. Control whether rounding or truncation occurs when inserting a TIME, DATE, or TIMESTAMP value with a fractional seconds part into a column having the

The space required to store a JSON document is roughly the same as for LONGBLOB or LONGTEXT; see Section 11.7, “Data Type Storage Requirements”, for more information. It is important to keep in mind that the size of any JSON document stored in a JSON column is limited to the value of the `max_allowed_packet` system variable.

What is a T1 Line? - Definition from Techopedia

Businesses use leased line internet services to offer T1, T3 or fractional T3 levels of performance because those are the most cost-effective options. More About T1 Lines and T3 Lines Owners of small businesses, apartment buildings, and hotels once relied on T1 lines as their primary method of internet access before business-class DSL became ...

Datatypes In SQLite Version 3

Magnetic resonance imaging (MRI) is a medical imaging technique used in radiology to form pictures of the anatomy and the physiological processes of the body. MRI scanners use strong magnetic fields, magnetic field gradients, and radio waves to generate images of the organs in the body. MRI does not involve X-rays or the use of ionizing radiation, which distinguishes it from CT and PET scans.

Magnetic resonance imaging - Wikipedia

`fractional_seconds_precision` is optional and specifies the number of digits in the fractional part of the `SECOND` datetime field. It can be a number in the range 0 to 9. The default is 6. For example, `'26-JUN-02 09:39:16.78'` shows 16.78 seconds. The fractional seconds precision is 2 because there are 2 digits in `'78'`.
