Agricultural Development in China, 1368-1968 | Bookshare

History. The development of farming over the course of China's history has played a key role in supporting the growth of what is now the largest population in the world. Analysis of stone tools by Professor Liu Li and others has shown that hunter-gatherers 23,000-19,500 years ago ground wild plants with the same tools that would later be used for millet and rice.

(PDF) China's 40 years of agricultural development and reform

Agricultural development promotes the proper conditions for farming so that planting, harvesting and processing of crops can be done effectively, which ultimately can reduce poverty and save lives. Someone who specializes in agricultural development may be tasked with calculating how to increase crop yields.
