Information architecture is an often misunderstood job title. Are they designers? developers? managers? All of the above? In this article we'll discuss what information architecture is, why it's related to usability, and what are the common tools/programs used in information architecture.

### **Ambient Findability By Morville Peter**

In computing, ambient intelligence (Aml) refers to electronic environments that are sensitive and responsive to the presence of people. Ambient intelligence is a vision on the future of consumer electronics, telecommunications and computing that was originally developed in the late 1990s by Eli Zelkha and his team at Palo Alto Ventures for the time frame 2010-2020.
