An Introduction To Mechanics : Free Download, Borrow, and ...

Kleppner reflects upon his childhood as being "normal, but very happy." Daniel Kleppner lived in a family with no scientific background, with one older brother and one younger sister. He and his older brother built various objects, such as electronic devices. Kleppner also learned woodworking, which soon became his lifelong hobby. In high school, Kleppner's interest in physics was rejuvenated by an excellent teacher.

For a long time, I don't think there was any alternative to Kleppner and Kolenkow for a student who really wanted to know the whys and wherefores of freshman mechanics. The big-selling texts like Halliday may carefully derive certain things, but in other cases they just pop an equation onto the page and expect the student to use it without ...

Daniel Kleppner - Wikipedia

With reference to the sketch, the height is $A \cos \theta$, so the frontal area is $AB \cos \theta$. The depth is $C \sin \theta$, so the volume V is $V = (AB \cos \theta)(C \sin \theta) = (AC \cos \theta)(BC \sin \theta) = A(B \cdot C)$ The same approach can be used starting with a different face. $V = C(A \cdot B) = B(C \cdot A)$ Note that $A;B;C$ are arbitrary vectors.
