Organic Architecture Today. There are many interpretations of organic architecture today. While some argue it is defined by the connection between the interior and exterior and the practice of abstracted plant geometries, others perceive it as a form of architecture embedded in nature's forms and principles.

## **Organic Architecture**

Wright's Fallingwater, built in the late 1930s as a holiday home for the wealthy Kaufmann family, is a true classic of organic architecture. Nowadays, the house is rightly regarded as a classic of modernist architecture - but when the Kaufmann's first looked at Wright's plans for their new summerhouse, they were actually disappointed.

## **Organic architecture**

Organic architecture refers to a philosophy of architecture advocating harmony of the human establishment with the natural organic ambience. This is achieved by adopting special design approaches that are empathetic with the natural site, so that buildings, furnishing, and ambience become more of a unified, interlinked composition.
