Anatomy Trains and Myofascial Meridians | HFE Blog

Anatomy trains (or myofascial meridians) are lines of connective tissue which in part resemble the pathways of the meridians of Traditional Chinese Medicine (TCM). The proponent and discoverer of these anatomy trains is Tom Meyers who first theorized them based on his own therapeutic experience.

Elsevier: Elsevier Ltd: Anatomy Trains Myofacial Meridians ...

To qualify as a myofascial meridian or Anatomy Train, a chain had to have: a minimum of three muscles in the chain and they had to line up in the body’s fabric, like the hamstrings and the gastrocs, and they had to stay at the same level – no jumping from superficial to deep. There are 12 of these myofascial meridians I have mapped so far.

The Evidence of Anatomy Trains Myofascial Meridians

Get a multi-dimensional understanding of musculoskeletal anatomy with Anatomy Trains: Myofascial Meridians for Manual Therapists and Movement Professionals, 4th Edition.This hugely successful, one-of-a-kind title continues to center on the application of anatomy trains across a variety of clinical assessment and treatment approaches — demonstrating how painful problems in one area of the ...

Anatomy Trains (Myofascial Meridians)

Myers developed the myofascial meridians as a way of explaining the role of the fascial system in relation to human structure and function. Myers book Anatomy Trains (2008) has become a leading resource in the study of the fascial network but should be considered in context as only ‘one’ way of considering the way the fascial network can work.
