D) Accelerating multitask reinforcement learning with attention mechanisms. Description: Reinforcement learning has recently been successful in behaviour learning in a variety of high-profile, complex tasks. Unfortunately, it is generally very sample inefficient, which has implications for it being widely used in real-world problems.

What is Writing to Learn? - The WAC Clearinghouse

Web Stayman was preparing to teach his Build an Imager course when the COVID-19 pandemic and related shutdown hit in March 2020, quickly forcing Johns Hopkins and other universities to cancel in-person classes. So Stayman did what any innovative engineer would do: grabbed one of the instrument systems used in class to bring home and taught all labs from his living room over Zoom.
