The drinking of more than 5 liters of tea per week may result in dental or skeletal fluorosis [4]. Mercury, lead, arsenic, and cadmium as well as other toxic elements have been found in tea leaves as described in the literature [5, 6]. Lead, arsenic, and cadmium have also been found in brewed black tea [7].

Arsenic For Tea | Robin Stevens

Once released, arsenic remains in the environment for a long time. Arsenic is removed from the air by rain, snow, and gradual settling. Once on the ground or in surface water, arsenic can slowly enter ground water. High arsenic levels in private wells may come from certain arsenic containing fertilizers used in the past or industrial waste.

Arsenic in Private Water Wells - University of Arizona

In Arsenic For Tea, Robin Stevens gives us a much deeper look at the character of Daisy Wells. As with most kids who are domineering and brash, there is a very good reason for it, and in Daisy's case it is to hide a girl whose family life is not quite as perfect as she would have anyone on the outside expect.
