Introduction to Fermentation Genetically modified. Escherichia coli. have been chosen as the host organism for each of the co-proteins to be produced.

### **Starch Hydrolysis by Amylase**

Industrial fermentation is the intentional use of fermentation by microorganisms such as bacteria and fungi as well as eukaryotic cells like CHO cells and insect cells, to make products useful to humans. Fermented products have applications as food as well as in general industry. Some commodity chemicals, such as acetic acid, citric acid, and ethanol are made by fermentation.
