This current varying in
parallel circuits
brought about

Kirchoff's next big law
in basic electrical
engineering, Kirchoff's
Current Law (KCL). This
law basically states
that current into a
node will equal the
current out of the
node. In other words,
the net current in a
node is zero or $0 = I(\text{in}$

Basics of Electrical Engineering

The medium-voltage system configurations shown are based on using metal-clad drawout switchgear. The service continuity required from electrical systems makes the use of single-source systems impractical. In the design of a modern medium-voltage system, the engineer
