BIOS 360. Introduction to Paleontology. 4 hours. The morphology, ecology, and relationships of fossil organisms. Basic principles of paleontology, including evolution, paleoecology and functional morphology. Course Information: Same as EAES 360. Field trip required at a nominal fee. One day field trip to collect fossils.

Guides: APA, MLA, and Harvard citation style guides - Cite ...

Darwinism designates a distinctive form of evolutionary explanation for the history and diversity of life on earth. Its original formulation is provided in the first edition of *On the Origin of Species* in 1859. This entry first formulates 'Darwin's Darwinism' in terms of five philosophically distinctive themes: (i) probability and chance, (ii) the nature, power and scope of selection ...

Massive Open Online Courses (MOOCs) | University of Alberta

Evidence of common descent of living organisms has been discovered by scientists researching in a variety of disciplines over many decades, demonstrating that all life on Earth comes from a single ancestor. This forms an important part of the evidence on which evolutionary theory rests, demonstrates that evolution does occur, and illustrates the processes that created Earth's biodiversity.
