Resources in this section pertain to the formation and evolution of the Earth and how it has been discovered through the relative and absolute dating of rocks and fossils.

Bedrock Correlation by STEVE KLUGE (ID: 725)

Rock Layer Correlation Lab Correlation is the process used by geologists (or stratigraphers) to "match" rock layers and formations of one outcrop to rock layers and formations of another outcrop that are of similar age. Correlation is done by matching rock layers by rock type, grain size, the presence of fossils and other distinctive features.
