There are specific categories of books on the website that you can pick from, but only the Free category guarantees that you're looking at free books. They also have a Jr. Edition so you can find the latest free eBooks for your children and teens.

Pentosin - Transmission Fluid

Most owner's manuals do not specify a CVT transmission flush interval, stating that the continuously variable transmission fluid (CVTF) will last the lifetime of the vehicle. You will find, however, that a vehicle with many miles may develop a leak in the transmission fluid , or the fluid may become burnt or contaminated and require changing .

CVT Transmission Life Expectancy (Are They Reliable?)

In many cars, a transfer case is located close to hot exhaust components; the heat also causes the fluid to deteriorate sooner. See this photo of the inside of a failed power transfer unit at 105,000 miles. In our opinion, even for normal driving conditions, the transfer case fluid should be changed at least every 60,000-70,000 miles or sooner if so recommended in the maintenance schedule.

Lucas Transmission Fix Review [an expert's opinion]

For initial fill or service refill, a transmission's best defense is Pentosin OE-quality Transmission Fluid from CRP Automotive. Pentosin offers a synthetic high performance Transmission Fluid program for use in today's automatic, manual, and even the new double clutch transmissions.

Honda Accord: How to Check Transmission Fluid | Honda-tech

Changing the transmission fluid used to be a staple of routine maintenance schedules, usually every 50,000 miles. These days, though, the transmissions in many vehicles are filled with fluid that may need to be changed only every 150,000 miles – or never, according to some automakers.
