Chemistry is the scientific discipline involved with elements and compounds composed of atoms, molecules and ions: their composition, structure, properties, behavior and the changes they undergo during a reaction with other substances.. In the scope of its subject, chemistry occupies an intermediate position between physics and

Chemistry - Organic Wikipedia

We report a palladium-catalyzed, ligand promoted, C-H fluorine-containing olefination of anilides with 4-brom o-3,3,4,4-tetrafluorobut ene as the fluorinated reagent, which has a potential transformation into other compounds due to its -CF₂CF₂Br functional group. -CF₂CF₂H was
