Developmental psychology is the scientific study of how and why human beings change over the course of their life. Originally concerned with infants and children, the field has expanded to include adolescence, adult development, aging, and the entire lifespan. Developmental psychologists aim to explain how thinking, feeling, and behaviors change throughout life.

The one-child policy (Chinese: 一胎政策) was part of a broad program designed to control the size of the rapidly growing population of the People's Republic of China. Distinct from the family planning policies of most other countries, which focus on providing contraceptive options to help women have the number of children they want, it set a limit on the number of births parents could have ...
