A powerful motor provides twice the flow rate of other extended-life circulation pumps. The motor is totally enclosed fan-cooled (TEFC) for use in dusty, dirty, and damp environments. Magnets turn the impeller to eliminate seal wear and leakage for a long service life. These pumps are often used with electroplating and photographic solutions.

### **Air conditioning - Wikipedia**

Due to the emission of greenhouse gases from the transportation, industrial, and residential sectors, the earth's temperature continues to rise. Due to this, the global chiller market, which valued \$7,330.7 million in 2019, would witness a CAGR of 5.0% during 2020-2030 (forecast period), to reach past \$10,880.3 million by 2030.
