This is a standard Caesarian Shift cipher encoder, also known as a rot-N encoder and is also a style of substitution cipher. This way, you can add one, two, or any number up to 25 to your string and see how it changes. This is an offshoot of the rot13 encoder on this web site. To perform this shift by hand, you could just write the alphabet on ...

Cipher suites can only be negotiated for TLS versions which support them. The highest supported TLS version is always preferred in the TLS handshake. For example, SSL_CK_RC4_128_WITH_MD5 can only be used when both the client and server do not support TLS 1.2. 1.1 & 1.0 or SSL 3.0 since it is only supported with SSL 2.0.
