Atlas - Burpee

Tomato diseases can be fatal unless you take management steps in a timely manner. It is important to catch any disease early, before it spreads to all of your tomato plants and possibly other plants in the same family, such as potatoes, eggplants, and peppers. Some diseases affect the foliage, while others

attack the fruit.

Norseco - semences de qualité depuis plus de 90 ans

This destructive disease of tomato foliage, petioles and stems (fruit is not infected) is caused by the fungus *Septoria lycopersici*. Infection usually occurs on the lower leaves near the ground, after plants begin to set fruit.

Numerous small,
