Determine which conic section is given based only on the equation. (If you do not get at least a 70% on the quiz you will be sent another link that you must complete and send in as well.) When you are done email me the Completion Certificate in an email (even if you made less than 70%).

lps.lexingtonma.org

The form most often used for circles is the following general equation: where (h, k) are the coordinates of the center and r is the radius. We are given the coordinates of the center as (4, -5), so h is 4 and k is -5. We still need to find the radius. We can do this by plugging in the second given ...
