ABB substations with gas-insulated switchgear (GIS) are unmatched when it comes to compactness, reliability, efficiency and safety, ensuring maximum power availability for utility, commercial and industrial customers.

GIS substations | ABB

The main purposes for establishment of a substation are: Need for connecting a generator to the transmission system: We have already discussed that generators generate electricity at a low voltage mostly below 22 kV. But bulk quantity of power can be transmitted to very long distance only at high or extra high voltage.

Gas insulated switchgear - Switchgear | ABB

GIS substation Construction.33/11kv ,Hingoli,Maharashtra.# Ideas Engineers.

standard80-2000. A 33/11kv indoor GIS substation with a 33kV fault level of 40kA is considered. The soil conditions considered are desert conditions and hence with poor resistivity. Soil resistivity measurement is done using Wenner 4 point method. The measured soil values are then analyzed using the Soil
