and click Uninstall > Follow the on-screen prompts.. Windows 8.1 & 8;; Open Start > Select Control Panel > Select Programs & Features > Find Driver Booster and click Uninstall > Click the Yes button when ...

db.grantRolesToUser() — MongoDB Manual

By default, `db.changeUserPassword()` sends all specified data to the MongoDB instance in cleartext, even if using `passwordPrompt()`. Use TLS transport encryption to protect communications between clients and the server, including the password sent by `db.changeUserPassword()`. For instructions on enabling TLS transport encryption, see `Configure mongod and mongos for TLS/SSL`.

db.changeUserPassword() — MongoDB Manual

`mysql_query()` manual entry actually correctly states it will use the last link opened by `mysql_connect()` by default. Thus if you have 2 connections you will need to specify the connection when calling `mysql_query` or issue the connect again to ensure the 1st database becomes the default, simply using `mysql_select_db` will not make the 1st ...
