Mercury and health - World Health Organization

Sometimes, a person's immune system mistakes food and other substances in the digestive tract for dangerous germs. It acts against healthy tissue by mistake. This causes inflammatory bowel disease (IBD). IBD includes several disorders that trigger chronic inflammation in the digestive tract.

Reptile - Digestive and urogenital systems | Britannica

Mercury may have toxic effects on the nervous, digestive and immune systems, and on lungs, kidneys, skin and eyes. Mercury is considered by WHO as one of the top ten chemicals or groups of chemicals of major public health concern.

Kahoot!

Inflammatory bowel disease is a term for a group of conditions that cause a portion of the digestive system to become inflamed; the most common types are ulcerative colitis and Crohn's disease. Symptoms may include abdominal pain, diarrhea (which may be bloody), loss of appetite, weight loss, and fever.

6 Reasons to See a Gastroenterologist - Healthgrades

I had just received my order of Amazing Grass Green Superfood Organic Powder and happen to go to the world's largest retailer (name omitted so the powers that be won't kick this honest review) and right there in their health product section is a huge display of this product in the exact same size for just \$14.97.
