...

Biocatalysis has emerged as an important tool in the industrial synthesis of bulk chemicals, pharmaceutical and agrochemical intermediates, active pharmaceuticals, and food ingredients. However, the number and diversity of the applications are modest, perhaps in part because of perceived or real limitations of biocatalysts, such as limited enzyme availability, substrate scope, and operational stability.

So, now is a good time to dispel a few of the more persistent myths around carpet. Myth #1: 'PVC-free' is the number one thing to look for in carpet. Despite the scrutiny from NGOs, PVC is not the number one concern that experts have about chemicals in carpet. Because PVC is an inert plastic, it's non-toxic to use.
