### COMPUTER SCIENCE & SYSTEMS - TACOMA

A fundamental problem in distributed computing and multi-agent systems is to achieve overall system reliability in the presence of a number of faulty processes. This often requires coordinating processes to reach consensus, or agree on some data value that is needed during computation. Example applications of consensus include agreeing on what transactions to commit to a database in which order ...

### Distributed Operating Systems And Algorithms

TCSS 591 Research Seminar in Distributed Systems (1-3, max. 5) Discusses recent developments in distributed systems, focusing on applications and advancements in the areas of distributed systems, cloud computing, and networking.
