energy markets, and further assisted by greater availability of data, technology resources and knowledge. Against this backdrop, companies have created or developed risk functions and worked on evolving the organization and its governance, policies and models, as well as processes and technology to support the risk management and control activity.

OPERATIONAL RISK MANAGEMENT IN THE ENERGY INDUSTRY

Whole systems thinking. Energy is a system-based business where every element has implications for the others. The best way to make improvements to generation, organisation, infrastructure and investment is to take a 'whole systems thinking' approach. Our team brings this industry-wide perspective, to integrate the different energy vectors, storage and network infrastructure with the built ...
