Dissociative identity disorder (DID), previously known as multiple personality disorder (MPD), is a mental disorder characterized by the maintenance of at least two distinct and relatively enduring personality states. The disorder is accompanied by memory gaps beyond what would be explained by ordinary forgetfulness. The personality states alternately show in a person's behavior; however ...

### NGL - Social Studies

Classical and operant conditioning are two important concepts central to behavioral psychology. While both result in learning, the processes are quite different. To understand how each of these behavior modification techniques can be used, it is also essential to understand how classical and operant conditioning differ from one another.
