Understanding the Phosphonate Products

The radish (*Raphanus raphanistrum* subsp. *sativus*) is an edible root vegetable of the family Brassicaceae that was domesticated in Asia prior to Roman times. Radishes are grown and consumed throughout the world, being mostly eaten raw as a crunchy salad vegetable with a pungent flavor. There are numerous varieties, varying in size, flavor, color, and length of time they take to mature.

What is a Specialty Crop? | Agricultural Marketing Service

A recent study involving Eucalyptus showed that the concentration of phosphite ions in plants may determine the extent of host defense activation. When concentrations of phosphite ions in the roots were low, host defense enzymes were stimulated; but when concentrations of phosphite ions were high, host defense enzymes remained unchanged and the ...
