Charles, you are insightful, a poet, an inspiration. May we emerge from this great turning into a new light: joyful, free, full of life and compassion and love for each other, and our beautiful world. May our hearts break when we see injustice, and may we claim our true inheritance: children of the Light, of the Truth, of the One King.

The Coronation - Charles Eisenstein

The composition of the biosphere is a fundamental question in biology, yet a global quantitative account of the biomass of each taxon is still lacking. We assemble a census of the biomass of all kingdoms of life. This analysis provides a holistic view of the composition of the biosphere and allows us to observe broad patterns over taxonomic categories, geographic locations, and trophic modes.

Systems theory - Wikipedia

Biology is the scientific study of life. It is a natural science with a broad scope but has several unifying themes that tie it together as a single, coherent field. For instance, all organisms are made up of cells that process hereditary information encoded in genes, which can be transmitted to future generations. Another major theme is evolution, which explains the unity and diversity of life.
