This result appears puzzling because each twin sees the other twin as moving, and so, according to an incorrect and naive application of time dilation and ...

Mise en évidence. Le rayon de Schwarzschild est ainsi désigné en hommage à l'astronome allemand Karl Schwarzschild qui l'a mis en évidence, en décembre 1915 [2], en apportant la première solution exacte à l'équation d'Einstein [3]. Cette solution, appelée métrique de Schwarzschild, correspond au champ gravitationnel extérieur à une distribution sphérique de masse dans le vide [3].
