The “big bang” is a story about how the universe came into existence. It proposes that billions of years ago the universe began in a tiny, infinitely hot and dense point called a singularity. This singularity supposedly contained not only all the mass and energy that would become everything we see today, but also “space” itself.

Genesis and the Big Bang

Genesis and the Big Bang. The book of Genesis says that the earth was created on Day 1. It also states that God made the stars on Day 4. The Big Bang says that the stars were formed before the earth. A complete contradiction from what the Bible says. The Big Bang is exactly opposite from what the Bible says
