1. What is a grid? In design, a grid is a system for organizing layout. The layouts could be for print (like a book, magazine, or poster), or for screen (like a webpage, app, or other user interface). There are a lot of different types of grid, and they all serve different purposes. Here are some of the main examples: Baseline grid.

A grid will help guide the viewer to the information they want . The foremost purpose of a grid – in graphic design at least – is to establish a set of guidelines for how elements should be positioned within a layout. Not only does an effective grid provide the rhythm for a design, but it also defines the meter.
