This book is a revision of Henrici's original work [cf. R.A.M., x, p. 257] completely rewritten by the above three authors aided by Henrici's own notes. There is an addition of three entirely new chapters and some portions of the original are deleted. The stress on medical and industrial applications of mycology has been intensified and the discussions of life-cycles in the first chapter...

### Henricis Molds, Yeasts and Actinomycetes.

The comparatively meager literature in the English language on the subject of fungi and actinomycetes as causative agents of human and animal diseases is receiving in this book most expert consideration. In addition, the authors present a detailed discussion of the utilization of fungi, yeasts and actinomycetes for industrial and food purposes.
