All T56 transmissions installed in late-model cars use an electronic pickup to measure speed, but National's T56 is designed to use the standard speedo cable and T5 manual transmission's drive ...

## **How To Change Manual Transmission**

Manual Transmission Fluid Change Interval. The manufacturers of most vehicles recommend that you change your manual transmission fluid at least every 30,000 miles or at the most 60,000 miles, depending on the make and model of the manual vehicle. You'll want to check your car manual for the actual recommended interval. But if you are constantly putting your manual transmission under stressful conditions, then the fluid should be changed sooner, maybe even at 20,000 miles.

## **How to Change Manual Transmission Fluid - Why and When to ...**

When to Change Manual Transmission Fluid. The fluid of manual transmissions has a shorter lifespan. The typical manufacturer of a manual vehicle will tell you to change your fluid at around 30,000 to 60,000 miles. Of course, every make and model will likely have a different recommendation, but one that is within this range of miles.
