Glass is a non-crystalline, often transparent amorphous solid, that has widespread practical, technological, and decorative use in, for example, window panes, tableware, optics, and optoelectronics. The most familiar, and historically the oldest, types of manufactured glass are "silicate glasses" based on the chemical compound silica (silicon dioxide, or quartz), the primary constituent of sand.

### **Pilkington K Glass™**

Stained glass is transparent colored glass formed into decorative mosaics and set into windows, primarily in churches. During the art form's heyday, between the 12th and 17th centuries CE, stained glass depicted religious tales from the Judeo-Christian Bible or secular stories, such as Chaucer's Canterbury tales. Some of them also featured geometric patterns in bands or abstract images often ...
