on power relations as well as the coproduction of nature and society. Theoretical inspirations are taken from different sources such as political economy, poststructuralism, and peasant studies.

Engineering the Environment: The Politics of 'Nature ...

The cause of environmental degradation is deeply rooted in human culture. Through hundreds of years of industrialization and exploitation of natural resources, humans are acting on the assumption that we are the dominant species on earth. because of our cleverness, science and power and the pursuit for materialism has deprived human of due reverence to nature.

Living with Nature: Environmental Politics as Cultural ...

The environmental politics of sustainable development has reached an impasse, despite the optimism that attended the 'Earth Summit' held in Rio de Janeiro in 1992. Notwithstanding wide recognition of the environmental crisis, environmental protection continues to be regarded as less important than economic competitiveness.

Taoism Is Environmentalism | HuffPost

Environmentalism or environmental rights is a broad philosophy, ideology, and social movement regarding concerns for environmental protection and improvement of the health of the environment, particularly as the measure for this health seeks to incorporate the impact of changes to the environment on humans, animals, plants and non-living matter.

List of issues Environmental Politics

Environmental politics designate both the politics about the environment and an academic field of study focused on three core components: The study of political theories and ideas related to the environment; The examination of the environmental stances of both mainstream political parties and environmental social movements; and The analysis of public policymaking and implementation affecting the environment, at multiple geo-political levels. Neil Carter, in his foundational text Politics of the

A brief essay on the nature of (and in) environmental ...

Nature is not merely an object of either individual or collective choice, but a condition of choice (p. 34). Not only do physical capabilities such as bodily health depend on a threshold level of environmental protection, but even capabilities such as imagination, play and practical reason may be severely constrained by ecological destruction.
