## **Llewellyn's 2020 Daily Planetary Guide Complete Astrology ...**

Astrology is a science that examines the action of celestial bodies upon all living beings, non-living objects and earthly conditions, as well as their reactions to such influences. The study of the stars is one of the oldest sciences known to humankind, tracing its origins back to ancient Sumer and even earlier.

Currently the sun, the new moon, and Jupiter are all stationed in Sagittarius, making for some pretty potent energy. This is a time when your internal world is begging to be set free and allowed to manifest, but before it can do so, you must first find the words to describe what it is you are experiencing and what it is...
