VII "A Musical Physiognomy": On Theodor W. Adorno's Mahler ...

The subject of this classic of musical analysis is the complicated phenomenon of Mahler's music and our response to it. The treatment is philosophical/psychological/analytic and the abstractness and complexity of the prose is typical of what one would find in a doctoral thesis, except that it is beautifully written (and Jephcott's translation is itself a work of art).

The expressive marking "schattenhaft" appears twice in Gustav Mahler's symphonies: at the beginning of the scherzo in the Seventh and within the first movement of the Ninth. Theodor Adorno's observations regarding Mahler's use of this marking, which connect it to Schopenhauer and Romantic aesthetics, provide the framework for an examination of possible meanings of these two passages in Mahler.

tentions. Mahler can only be seen in perspective by moving still closer to him, by entering into the music and confronting the incommensurable presence that defies the stylistic categories of program and absolute music no less than the bald historical derivation from Bruckner. His symphonies assist such closeness by the com

Mahler, according to Adorno, met the objective demands of the form of orchestral music in such a way that his material revealed the negative truths of the general course of history. This is not music about the existential meaning of life, the jargon of authenticity as Adorno might say, but about the paradoxes of social life that at once confer happiness and isolation on the outcasts of society.

Mahler: A Musical Physiognomy by Theodor W. Adorno

To begin with, Mahler conveys the externality of the world's course in terms of program music. The prototypical Scherzo of the Second Symphony, based on the Wunderhorn song of St. Anthony's sermon to the fishes, culminates in the instrumental outcry of one in despair. The musical self, the "we" that sounds from the symphony, breaks down.
