Northeastern University's Marine Science Center is located on 20 acres at the end of East Point, a rocky point extending into the Atlantic Ocean and has a view of the north shore of Massachusetts and the Boston skyline.

NEAS keys to the benthic marine algae of the northeastern ...

Seaweed is the common name for marine algae. Even though they may look like underwater plants—in some cases, growing in excess of more than 150 feet in length—seaweeds are not plants at all. Instead, marine algae are a group of species from the Protista kingdom that fall into three distinct groups:
