Market Making A Simple Day

Market makers—usually banks or brokerage companies—are always ready to buy or sell at least 100 shares of a given stock at every second of the trading day at the market price. Market demand dictates where market makers set their bid prices (what they're willing to pay for shares) and ask prices (how much they're demanding), but market makers must always quote both prices for their trades.

Sell Products Online - Start an Online Store - Free Trial

Algorithmic trading is a method of executing orders using automated pre-programmed trading instructions accounting for variables such as time, price, and volume. This type of trading was developed to make use of the speed and data processing advantages that computers have over human traders.
