Medical Flashcards - Flashcard Machine - Create, Study and ...

Chemotaxis (from chemo-+ taxis) is the movement of an organism in response to a chemical stimulus. Somatic cells, bacteria, and other single-cell or multicellular organisms direct their movements according to certain chemicals in their environment. This is important for bacteria to find food (e.g., glucose) by swimming toward the highest concentration of food molecules, or to flee from poisons ...

TOP EFB. EFB 103 - General Biology II: Cell Biology and Genetics (3) Three hours of lecture per week. Organization and function of living cells. Key topics include biological molecules, organelle structure and function, gene expression, cell division, metabolism, photosynthesis, cell signaling, genomics, and population genetics.

A world-famous chemist tells the truth: there's no ...

Bacteriile au fost observate pentru prima dată în anul 1676 de către savantul danez Antonie van Leeuwenhoek, utilizând un microscop format din două lentile, pe care l-a construit însuși el. Ulterior, acesta a publicat rezultatele observațiilor sale într-o serie de scrisori trimise către Royal Society of London. Dintre toate studiile lui Leeuwenhoek, descoperirea bacteriilor este de ...
