Inside the infant mind. In addition to performing similar studies with younger infants, Tenenbaum plans to further refine his model by adding other physical principles that babies appear to understand, such as gravity or friction. "We think infants are much smarter, in a sense, than this model is," he says.

Mind-minded parenting: Does attuned "mental talk" help ...

Infant Brains Reveal How the Mind Gets Built. Saxe, a cognitive scientist at the Massachusetts Institute of Technology, went headfirst with him: lying uncomfortably on her stomach, her face near his diaper, she stroked and soothed him as the three-tesla magnet whirred around them. Arthur, unfazed, promptly fell asleep.

Mind-minded parenting is an approach that recognizes the independent thoughts and feelings of children. Parents assume their children's behavior is meaningful, and tune into their children's emotions, desires, and interests. They accurately read their children's communicative cues, and talk with kids about the world of the mind.
