The UCLA Molecular Diagnostics Laboratories perform a wide range of diagnostic nucleic acid-based tests for hereditary disorders, cancer diagnosis and management and other conditions. As one of the first facilities of its kind in the country, we pioneered applications of diagnostic DNA-based testing for a wide variety of genetic and neoplastic diseases, as well as DNA fingerprint analysis.

Home - Association for Molecular Pathology

Molecular pathology is an emerging discipline within pathology which is focused in the study and diagnosis of disease through the examination of molecules within organs, tissues or bodily fluids. Molecular pathology shares some aspects of practice with both anatomic pathology and clinical pathology, molecular biology , biochemistry , proteomics and genetics , and is sometimes considered a "crossover" discipline.
