Optimal Financial Decision Making under Uncertainty. Editors: Consigli, Giorgio, Kuhn, Daniel, ... Increasingly in recent years, financial management problems such as strategic asset allocation, asset-liability management, as well as asset pricing problems, have been presented in the literature adopting formulation and solution approaches ...

Optimal Decision Making Under Strategic Behavior

ysis. Because of the importance of risk aversion in decision making under uncertainty, it is worthwhile to first take an "historical" perspective about its development and to indicate how economists and decision scientists progressively have elaborated upon the tools and concepts we now use to analyze risky choices.

ECONOMIC AND FINANCIAL DECISIONS UNDER UNCERTAINTY

It is the most important financial decision. Since funds involve cost and are available in a limited quantity, its proper utilisation is very necessary to achieve the goal of wealth maximisation. The investment decisions can be classified under two broad groups:

Top 3 Types of Financial Decisions

Methods of Decision Making under Uncertainty. The methods of decision making under certainty are. There are a variety of criteria that have been proposed for the selection of an optimal course of action under the environment of uncertainty. Each of these criteria make an assumption about the attitude of the decision-maker.

Optimal Financial Decision Making under Uncertainty by ...

We use a fairly general framework to analyze a rich variety of financial optimization models presented in the literature, with emphasis on contributions included in this volume and a related special issue of OR Spectrum. We do not aim at providing readers with an exhaustive survey, rather we focus on a limited but significant set of modeling and methodological issues.
