The first part of the book presents current knowledge on the problem of noncompliance with prescribed medications. The second half offers new methods of seeking concordance in prescribing by using a patient-centred method. Patient vignettes are included to help put the recommendations in a practical light.

Patient-centered prescribing: Seeking concordance in practice

There has been growing support in England for a policy of medicines optimisation as a response to the rise of problematic polypharmacy. Conceptually, medicines optimisation differs from the medicines management model of prescribing in being based around the patient rather than processes and systems.
