### **Infectious Diseases Society of America Guidance on the ...**

Level 1 surveys include questions related to avoidance, sleep quality, repetitive unpleasant thoughts and other symptoms found in DSM-5 PTSD criteria. This level provides a measure for adults, a self-rated measure for children ages 11 to 17, and a guardian-rated measure for children ages 6 to 17.

### **Practice Advisory 1300 1 Quality**

2.1. Sources of information. Based on the guidance from Green et al on conducting a narrative review, 39 a preliminary search was conducted. A number of sources included in the review were identified through a scoping review conducted on person-centred quality indicators that revealed rich literature on PCC practice and measurement.

### **How to practice person-centred care: A conceptual framework**

Introduction. The rise in antimicrobial resistance (AMR) continues to be a global crisis [1, 2]. Collectively, antimicrobial resistant pathogens caused more than 2.8 million infections and over 35,000 deaths annually in the United States from 2012 through 2017, according to the 2019 Centers for Disease Control and Prevention (CDC) Antibiotic Resistant Threats Report [2].
