Prostaglandins are acidic lipids which can be enzymatically produced by most mammalian cell types in response to mechanical, chemical or immunological stimuli. The unsaturated fatty acid arachidonic acid is the precursor for the synthesis of the major classes of prostaglandins and leukotrienes, collectively known as eicosanoids.

BIOCHEMISTRY OF PROSTAGLANDINS AND CYCLOOXYGENASE IN CANCER

Prostaglandins, thromboxanes, and leukotrienes are enzymatically derived from essential fatty acids and constitute a unique class of polyunsaturated, hydroxylated, 20-carbon fatty acids categorized as eicosanoids. All prostaglandins are composed of a cyclopentanone nucleus with two side chains.

Prostaglandins: Chemistry, Functions and Clinical Importance

Prostaglandins contribute to the regulation of vascular tone, platelet function, and fertility. They also play key roles as inflammatory mediators and modulators of tumor biology. Although they are technically hormones, they are rarely classified as such.

thromboxanes, leukotrienes, lipoxins, resolvins, and eoxins. For each subfamily, there is the potential to have at least 4 separate series of metabolites, two series ...

Prostaglandins - Elmhurst College

Types of Eicosanoid Hormones: Three types of eicosanoids are recognized: (i) The prostaglandins. (ii) Leukotrienes, and (iii) The thromboxanes. The fourth type quite often recognized as prostacyclin is actually a type of prostaglandin (prostaglandin I₂). i. Prostaglandins:

Prostaglandin - Wikipedia

A prostaglandin is any member of a group of lipid compounds that are derived enzymatically from fatty acids and have important functions in the animal body. Every prostaglandin contains 20 carbon atoms, including a 5-carbon ring. They are mediators and have a variety of strong physiological effects;

Prostaglandin

There are different types of prostaglandins like PGD 2, PGE 2, PGF 2, PGI 2. [6,7] COX: COX is an enzyme that is responsible for formation of different forms of prostaglandins. It is also referred as prostaglandin synthase, prostaglandin endoperoxidase or prostaglandin G/H synthase. (PGS, PGTS, PGHS). [7]
