### Regulation of Mining in Africa | SpringerLink

Illegal mining in South Africa is a massive industry, mostly small-scale and artisanal in nature, it employs as many as 30,000 men, women and children. An estimated 10% of South Africa's gold production comes from small-scale and artisanal mining (ASM), which is explicitly banned as current regulations outlaw any activities that take place without a permit, including both invasive and merely informal mining.

### Mineral industry of Africa - Wikipedia

Illegal mining is on the rise in South Africa and presents challenges that need to be addressed from a range of perspectives. It takes place at abandoned mines and at operating mines with illegal miners often operating under dangerous conditions.

### Regulating Mining in Africa: For Whose Benefit?, 2004 ...

The second examines the creation of a new regulatory framework in the 1990s for mining in Africa. In the third section, a series of case studies illustrate how this process has given rise to specific mining codes and environmental regulations in different African countries. While in no way claiming to be exhaustive, the section adopts a compara-
