For example, R&D personnel ratio (internal expertise) has a strong positive effect on product and process innovation, and process innovation is also influenced by R&D intensity (R&D investment) (Song and Oh, 2015). R&D intensity seems to be influenced by knowledge and technology transfer activities (Arvanitis et al., 2008).

In probability theory and statistics, a copula is a multivariate cumulative distribution function for which the marginal probability distribution of each variable is uniform on the interval [0, 1]. Copulas are used to describe/model the dependence (inter-correlation) between random variables. Their name, introduced by applied mathematician Abe Sklar in 1959, comes from the Latin for "link" or ...
